

ROBUSTA

DROP ARM AWNING

by  TURNILS®

Thanks to the heavy-duty drop arms and roller tube, Robusta is a sturdy window awning especially suitable for large windows.

A stylish aluminium hood protects the fabric and roller tube from the elements. External or internal operation is with crank handle

and motorization is available as an option. Specially designed drop arms and slide rails convert Robusta into a balcony awning.

Operation

External or internal operation with crank or motor.
The motor can have automatic controls such as remote control or sun and wind sensors.

Installation

The awning can easily be installed directly on to the window architrave or the wall.

Drop Arms

Heavy-duty drop arms with adjustable springs provide excellent fabric tension.

Components

The selection of anti-corrosion and highly durable materials allows us to offer you a comprehensive warranty. No maintenance required.

Dimensions

Projection: 0.6m, 0.7m, 0.8m, 0.9m, 1.0m, 1.2m, 1.4m.
Maximum width: 6.0m per unit.

Balcony Awning

With the specially designed drop arms and slide rails, the heavy-duty arms can be adjusted vertically for balcony doors.
