

# SIESTA

## DROP ARM AWNING

by  TURNILS®

Siesta is a compact and affordable awning, suitable for the home or commercial building, available

with internal or external operation. A drop arm awning, Siesta has adjustable springs for excellent

fabric tension. This neat awning will compliment any window.

## Operation

Gear or tape, external or internal operation; for internal operation, the tape is guided through the window frame with a specially designed optional tape guide. For storage and protection there is an optional tape coil box.

## Installation

Siesta can easily be installed directly onto the window architrave, directly onto the wall, or into the recess. Optional recess brackets allow 45-285mm depth adjustment.

## Drop arms

Drop arms with adjustable springs ensure the correct fabric tension.

## Components

Manufactured from a selection of anti-corrosive, highly durable materials, which allow Turnils to offer a comprehensive 3 year warranty (excluding fabric).

No maintenance required for this beautifully simple, yet effective system.

## Dimensions

Projection: 0.5m, 0.6m, 0.7m, 0.8m, 0.9m, 1.0m  
Maximum width: 3.2m per unit

*Featuring: Sleek design aluminium hood to protect fabric from the elements and a neat front profile.*
